

## Jiwon Park

---

### Contact Information

**Hanyang University**  
**Department of Physics**  
222, Wangsimni-ro, Seongdong-gu,  
Seoul, 04763, Republic of Korea

Phone: +82 (10) 9996-4991  
E-mail: [jiwon.park@cern.ch](mailto:jiwon.park@cern.ch)  
Git: <https://github.com/minerva1993>

### Education

**Hanyang University**, Seoul, Korea

Ph.D. in Physics

**March 2017 ~ Present**

- Works on the [CMS](#) experiment
- Interested in particle physics experiment and phenomenology, machine learning, and big data analysis

**Hanyang University**, Seoul, Korea

B.S. in Physics

**March 2013 ~ February 2017**

- Honors: summa cum laude
- Kwanjeong Educational Foundation Scholarship (2015~2016)

### Research Interests

**Particle physics experiments, phenomenology, and machine learning**

Top quark physics, beyond standard model (BSM), flavor changing neutral current (FCNC) in top quark decay, muon detector (RPC) data quality monitoring, data analysis using deep learning

### Research Activities

**Hanyang University**, Seoul, Korea

Graduate Researcher (Adviser: [Prof. Tae Jeong Kim](#))

**December 2016 ~ Present**

- Flavor changing neutral current in top quark decay (tHq,  $H \rightarrow b\bar{b}$  process) (2017-present)
- Recasting LHC ATLAS SUSY search in di-stau to tau and neutralino channel with MadAnalysis5 (2020)
- Muon L1 trigger development for CMS Phase II upgrade (2019-)
- Phenomenology study for  $R(D^*)$  anomaly in top quark decay (2019)
- MadGraph5\_aMC@NLO commissioning in CMS Physics Generator group (2019)
- Muon isolation study using deep learning (2018)
- Muon RPC Data Manager (Shifter) (2018)
- Recasting LHC CMS exotic (dark matter) search in diphoton channel with MadAnalysis5 (2017)

Undergraduate RA (Adviser: [Prof. Jae-hyuk Oh](#))

**April 2014 ~ November 2016**

- Study on phase transition in Einstein-dilaton-U(2) gauge field theory using numerical method

### Teaching Experiences

**Hanyang University**, Seoul, Korea

Advising Undergraduate Thesis

- Search for leptoquark mediated top quark decay at 13 TeV
- Identification of additional b jets in  $t\bar{t}b\bar{b}$  process
- Jet assignment of  $t\bar{t}$  system in semileptonic decay channel using deep learning
- Search for FCNC in top quark decay using Fast Simulation
- Muon isolation study using deep learning
- Measurement of top pair production cross section with CMS Open Data
- Measurement of Z boson mass using CMS 7 TeV Open Data
